Reply to Attn of: EA-04-052

TO: INFN/Prof. Giuliano Laurenti
FROM: EA/Trent D. Martin
SUBJECT: TOF Vibration Fixture and Test Analysis

Carlo Gavazzi Space has performed all of your design and analysis work for the Time of Flight Systems for the Alpha Magnetic Spectrometer. I understand that you are currently looking for a contractor to develop a vibration test fixture and perform a test analysis. It is my recommendation that you continue to use your existing contractor to support this work. The team that you have in place is the most familiar with the hardware design and analysis. Choosing a different contractor at this stage could jeopardize the test.

Sincerely,
