EA-04-040

To: EA1/AMS Project Manager
From: EA2/AMS Deputy Project Manager
Subject: Export control guidance for the AMS Crew Operations Post (ACOP)

Per the attached e-mail from the AMS Program Manager at NASA HQ, the ACOP is officially considered part of the AMS payload and is therefore covered by all AMS export control reviews and rulings. In response to a question from ISS payloads about the ACOP export control guidelines, Mark Sistilli stated:

“As the NASA AMS Program Manager, I agree with your assumption that ACOP is one of many AMS subsystems and is therefore covered under the prior AMS 3/28/2002 letter regarding AMS compliance with U.S. Export Regulations.”
