Reply to Attn of: EA3-08-004

TO: JB/Supply and Equipment Management Officer

FROM: EA/AMS Project Manager

SUBJECT: Temporary Storage Review – Case Files 6-001

The above temporary storage items have been reviewed and it has been determined by this office the Alpha Magnetic Spectrometer hardware needs to continue in storage. The AMS is an active international project, and a place of storage is needed as manufacturing and integration activities continue. This office requests a 12-month extension of the storage period.
